

RSTMH journals declaration of contributions to an article

Title of article: Lassa fever cases suffer from severe under-reporting based on reported fatalities.

Authors: David Simons

For all types of articles published in the Royal Society of Tropical Medicine and Hygiene journals, each person named as an author in the published version must be able to show that they contributed substantially to the article in relation to the study design, its implementation, or analysis and interpretation of the data. All authors should have been involved in the writing of the manuscript at draft and any revision stages, and have read and approved the final version. Anyone who made major contributions to the writing of the manuscript should be listed as an author.

Any person who cannot be shown to have made a substantial contribution to the article **cannot** be listed as an author in the final version. The name of any person who is deemed to have made a minor contribution can, however, appear in the Acknowledgments section of the article. Authors should obtain permission from all those named in the Acknowledgements and forward details of this permission to the editorial office.

Please complete the table below to indicate the contributions of all named authors. Please provide additional information on a separate sheet if you feel someone has made a substantial contribution of a type that is not included in the table. For large groups of authors there is a continuation sheet overleaf.

Author's initials	Type of contribution				
	Study design	Study implementation	Analysis and interpretation of data	Major contribution to writing	Read and approved final version
DS	Yes	Yes	Yes	Yes	Yes

Signature (on behalf of all authors):

Date: 12/09/2022

Name: David Simons
